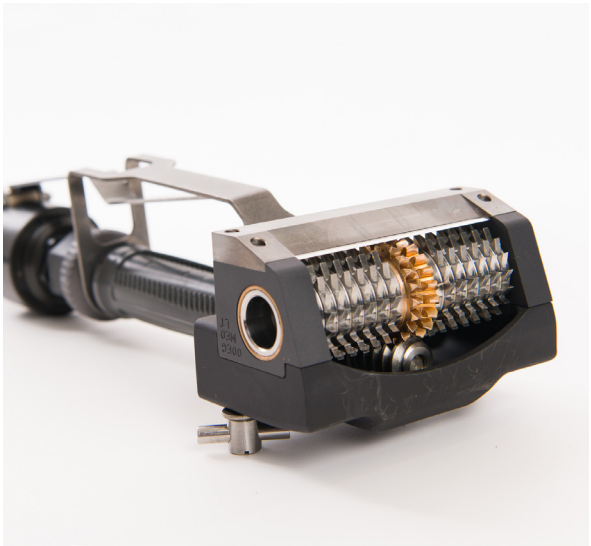
BETTCHER®

CYCLONE SKINNER™

90MM

Versatility, Yield and Safety*

THE ONLY ELECTRIC SKINNER YOU'LL NEED FOR SAFER AND MORE EFFICIENT OPERATIONS



CLASS-LEADING VERSATILITY - Choose between higher yields or faster production speeds

QUIETER AND LIGHTER THAN COMPETITOR TOOLS, so your operators are happier and safer*

ONE-HANDED ACTIVATION and a self-driving design for better throughput

SUPERIOR ENERGY SAVINGS over similar pneumatic tools

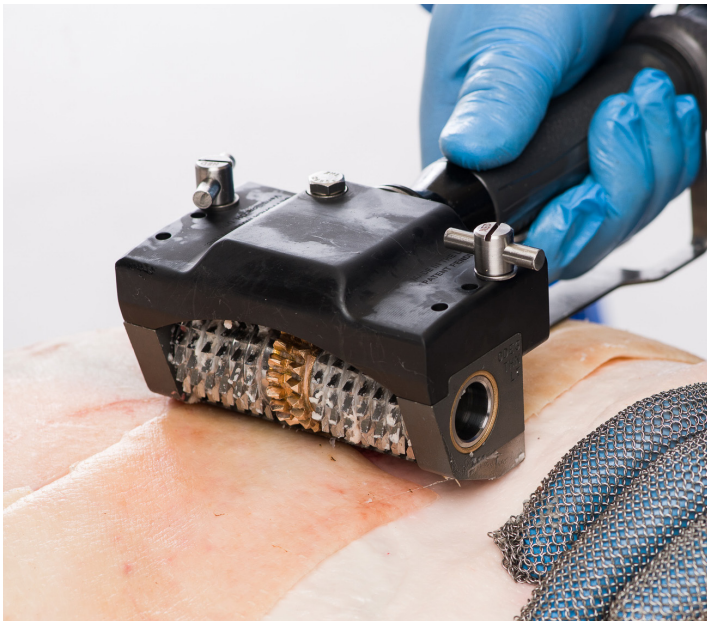
*Data on File. See user manual for indications and instructions for use.

Versatility and productivity in one powerful skinner

With the Cyclone Skinner™, you're in total control of the thickness of your cuts and the throughput of your plant. Its versatile side plates are designed to minimize your waste and maximize your return, so you can reap the rewards of levelling up your operations.

The electric-powered tool can yield up to 3.7% higher than competitive pneumatic skinners, resulting in 90% annual energy savings.

The Cyclones ease of use is evident in its one-handed activation and self-driving, high-friction tooth roll design. It's simplified design featuring few components, means faster maintenance and repair with shorter down times.



By maximizing skin removal the average plant can increase yields up to 104,700 kgs per year.

Quieter and safer than any other skinning tool

Do you want enhanced operator experiences with reduced risk to health and safety?

At a sound level of under 77dB(A), you won't find a quieter skinner on the market. It's not only easy on the ears; at up to 0.4kg lighter it remains one the lightest tools on the market, while also providing the widest cut path.

Bettcher's Cyclone Skinner™ will improve your employees' productivity and reduce their fatigue, which means greater happiness as well as better throughput.
